

As the government promotes the importance of education to young people, exciting challenges lie ahead for architects to develop innovative building solutions which facilitate the ever more demanding needs for flexibility, sustainability, technological advances, teaching methods and accessibility within the funding available.

PDG Architects Ltd has a wealth of experience and an established reputation for producing imaginative building designs that importantly stimulate learning whilst providing the students and teachers with the environment to promote education.

The strength of the practice comes from the ability to consult with all user groups and to apply a well-developed and detailed design response to each project from simple extensions, internal refurbishment and remodelling of existing buildings and spaces to new build and campus master planning. We have produced work for numerous nursery, primary, secondary and further education establishments throughout the eastern region.

Education

PDG Architects Ltd is the natural progression and development of the previous partnership of Peterborough Design Group, which was established in 1988, and provides architectural design and management services to both the private and public sector.

The Practice works from purpose-built offices in Shrewsbury Avenue, Peterborough, and has built a reputation of providing a personal, efficient and quality based service to our clients regardless of the size or nature of the project.

We believe that every project is unique and designs evolve from the specific requirements of the client, brief and site. Our aim is to ensure that schemes are delivered on time and to budget. This approach has been recognised by an array of Local and Regional Awards.

“PDG have worked for the college for a number of years... They have transformed the college with their inspirational and innovative designs. Their level of service, attention to detail and quality of work are second to none, whilst offering excellent value for money.”

Gary Wentworth, Project Engineer, Arthur Mellows Village College
